8500 Washington Blvd  
Pico Rivera, CA 90660

### **Why recycle used oil?**

Properly disposing and recycling used oil is critical in our community. Because the city of Pico Rivera is located above an aquifer, it is important that we safely dispose of used motor oil to avoid contamination of our water and soil. By recycling and refining used motor oil we save energy by not having to produce new motor oil.

### **Did you know?**

- One quart of oil poured down a storm drain can contaminate one million gallons of water!
- According to the EPA, Nearly **40%** of pollution in America's waterways is from used motor oil.
- Two hundred million gallons of used oil are improperly disposed of each year.
- Recycling just 2 gallons of used oil can generate enough electricity to run the average household for almost 24 hours.
